 Noise level: 69 dB. Air velocity 25m/s.

PRODUCT SIZE

Height - 220 mm
 Width - 210 mm
 Depth - 163 mm

PLANNING

Generally, one hand dryer is recommended for every two hand basins. For heavy use in large washrooms, use two hand dryers for every three basins. Install hand dryers adjacent to wash basins, out of the way of projecting storage cabinets or other objects to optimise access and movement around the dryer. In congested areas, site dryers to ensure good traffic flow between wash basins and dryers. If more than one is used, dryers should be placed at least 500mm to 600mm apart.

ELECTRICAL SAFETY APPROVALS

AS3304, AS3300, NZ6362, NZ6300, IEC335-2-23:1996, IEC 335-1:1991 incl Amend 1, EN55014, EN50082-1, EN60555-2/3, International CB Text Certificate No. AU0182, Certificate of suitability (Australia) No. Q070141

ELECTRICAL CONNECTION & ADDITIONAL NOTES

Installation and servicing should be carried out by a qualified person. Fixed wiring is recommended for all installations. Wiring should emerge from the wall at the position marked fixed wiring & supply cord entry. All wiring, related switches and circuit protection must be installed in accordance with local electrical wiring regulations and codes. This unit is double insulated and does not require earthing/grounding.

RECOMMENDED MOUNTING HEIGHTS

From the floor to the bottom of the dryer:
 Men's washrooms - 1200mm.
 Women's washrooms - 1150mm.
 Children's washrooms ages up to 10 - 860mm.
 Children's washrooms ages up to 16 - 1120mm.
 Disabled person's washrooms - 1015mm.
